PROJECTS

E-commerce Website Development: Multi-Product Shopping Platform, 396 Days

Developed a dynamic e-commerce website utilizing Django, HTML, CSS, and JavaScript to create a comprehensive shopping platform for the company's products. The website provided an intuitive and user-friendly interface, enabling customers to browse, search, and purchase products efficiently. Implemented responsive design principles to ensure seamless user experience across devices. Integrated secure payment gateways and order management systems to facilitate smooth transactions and streamline business operations.

Android Screen Streaming Web Application: Seamless Remote Access and Control, 610 Days

Designed and developed an innovative web application using React.js that enables users to remotely stream and control their Android device's screen. The application provides a user-friendly interface, allowing seamless login, real-time screen sharing, remote control functionalities, screen capture, and screen recording capabilities. Leveraged modern web technologies to deliver a responsive and intuitive experience for users seeking remote access to their Android devices.

Advanced Quiz Management System: Confidential Project in Django, AJAX, HTML, CSS, and JavaScript, 786 Days

Developed an internal quiz management system using Django, AJAX, HTML, CSS, and JavaScript. Implemented various question types and integrated security features for user privacy and data protection. Collaborated with a team of developers and stakeholders to ensure the successful delivery of the project. Involved in the full software development lifecycle, including requirement analysis, design, coding, testing, and documentation.
